Dear Hiring Manager,

I am excited to apply for the full-time Software Engineer position. As a computer science major at UC Davis, I have gained experience working in cross-functional teams through my internship working on the Power Performance and Analytics team at Intel Corporation. As a software engineer intern, I developed strong technical skills and leadership abilities, which I believe make me an ideal candidate for the role.

In my role as a software engineer intern, I worked closely with my team of managers, software engineers, as well as hardware engineers to deliver high-quality software solutions. I was responsible for leading the technical aspects of the coding process of my assigned dashboard, which involved collaborating with other engineers to write efficient, scalable, and maintainable code. Through this experience, I developed strong leadership skills and became proficient in agile software engineering methodologies.

Moreover, I have gained a deep understanding of the software engineering process through my experience at Intel. I understand the importance of collaboration and communication in software projects, and I am comfortable working in a team-based environment. I am excited about the opportunity to contribute to the company's success by bringing my technical skills, leadership abilities, and experience working in cross-functional teams to the role of a full-time Software Engineer. I am so excited as I am the first generation in my family to enter the software development field.

Thank you for considering my application. I look forward to the opportunity to further discuss how I can contribute as a full-time Software Engineer.

Sincerely,
Alexander Hoang
